STATISTICAL REPORT ON THE SECONDARY TEXTILE INDUSTRY

IN CANADA

PREPARED BY THE STATISTICS BRANCH, RESEARCH DIVISION,

WARTIME PRICES AND TRADE BOARD.

(Civilian Production Only).

This report is a summary of the information which has been supplied since 1942 to the Statistics Branch of the Wartime Prices and Trade Board by all branches of the textile industry. The data collected in the quarterly reports submitted to the Board by the secondary textile manufacturers has been invaluable in dealing with the many problems connected with the supply of essential civilian needs. These reports provided a current record of production which was absolutely necessary in determining the proper allocation of materials and labour. Where directive programs were found necessary the material collected in these returns was very important in setting up the programs and following the course of production. The marked increase in the output of children's wear is a notable example of the Board's use of directives to meet essential civilian requirements. Since much of this information has not been previously available to the industry, the Board has decided to make public a summary of these figures.

For the most part the tables which follow are self-explanatory. However, this material is not always fully comparable with that already published by the Dominion Bureau of Statistics as the Board approached the problem by emphasizing the end products which might be in short supply, and the figures represent total Canadian production without regard to the industrial classification of the producer.

In the secondary industry production figures were collected from firms classified as garment manufacturers. This eliminated any producers listed as merchant tailors, contractors, or dress-makers. Manufacturers were, however, required to report garments made up for them by contractors. In cases where a reported item is produced by only one or two companies, it has been omitted or combined with another item in order to prevent disclosing the production of an individual company. Purchases for use by the armed services were made by the Department of Munitions and Supply. All such purchases have been omitted from this report which shows only production for civilian use. The category "other" in these tables refers to a miscellaneous collection of rather unimportant items.

These figures are subject to revision and are not entirely complete due to lack of coverage particularly in the case of new entrants during 1945. However, the information has been carefully examined, and it is felt that these figures represent a fair indication of production for the years covered.
